### IT Professionals

#### Sallycomputechs for Small Business IT Service and Support

Whatever your computer needs, Sallycomputechs can help. We provide comprehensive information technology (IT) service and support for small businesses just like yours throughout the San Francisco Bay Area. As Microsoft Certified Small Business Specialists, we can help you implement the most cost-effective solutions to meet your needs and build a path for future upgrades. We can custom build systems or help you in the purchase and installation of off-the-shelf components. In the event you suffer a hardware or software failure, all it takes is one phone call and we'll be on site.

#### Companies we've helped:

We upgraded a software company's old email system to Microsoft Small Business Server 2003. Not one email was lost and the downtime was less than an hour.

We helped an accounting tax services company make its data accessible and secure to all employees working in the office and remotely, using all its current computers and hardware. We reconfigured the router, tuned up the desktop computers, and reconfigured the Microsoft Small Business Server 2003.

#### Qualifications:

- Over 15 years of experience
- Microsoft Certified Desktop Support Technician (MCDST)
- Microsoft Certified Professional (MCP) Windows XP
- Microsoft Certified Small Business Specialist (MSBSC)

Our goal is to be one of your most valuable business assets. Call us today to arrange a complimentary meeting to talk about your IT needs.
